

BREW  MATIC

BUILT-IN  
**COFFEE**  
APPLIANCE

*Perfection,  
At Your Fingertips*

BREW  MATIC®

- Fingertip Electronic Controls
- Sleek Space-Saving Design
- Adjustable Brew Size Selector
- Programmable Preset Brew Time
- Beautiful Stainless Steel Construction
- Professional Commercial Grade Components
- Plumbed Directly Into Water Supply

*It brews at the perfect temperature,  
for a perfect cup of coffee every time,  
anytime.*

## *Perfection In Each Component's Design*

- **Performance Spray Head**

The design and layout of the spray head allow for complete saturation of the coffee grounds, ensuring the perfect cup of coffee.

- **Water Flow Rate**

Water flow rate is controlled and programmed at the optimal setting so that the coffee grounds are bathed in the perfect amount of water throughout the entire brewing process, ensuring the perfect cup of coffee.

- **Unique Brew Cone**

The special shape of the brew cone allows for a perfect extraction whether you are brewing a full pot or a single mug, ensuring the perfect cup of coffee.

- **Optimal Brewing Temperature**

The brewing temperature is actively monitored and controlled by a series of microprocessors and on-board sensors to assure that coffee is brewed at the optimum temperature range, ensuring the perfect cup of coffee.

## *User Friendly Features*

- **Auto Brew Function**

Allows the user to program the brewer to automatically brew coffee at a certain time. Have fresh, hot coffee waiting for you in the morning or after a meal.

- **Adjustable Brewing Volumes**

The brew volumes are adjustable and include programmed options for brewing a full, half, or quarter carafe. The brewer can also be programmed for the precise capacity of your travel mug and brew directly into it - for the ultimate in “on-the-go” convenience.

- **Adjustable Temperature Settings**

Five pre-programmed, adjustable temperature settings allow for a “fine-tuning” of the brewing temperature without dropping below or rising above the recommended coffee brewing temperature range.

- **Instant Source of Hot Water**

Since the brewer is connected to a direct water line, it also serves as an instant source of hot water. Perfect for brewing teas, soups, hot chocolate and other cooking needs.

## *A Perfect Companion to Any Décor*

- The design and stainless steel construction enhances any kitchen décor
- Space saving, built-in design takes the brewer off the counter, eliminating clutter and mess
- Perfect for the kitchen, master suite, offices, yachts and recreational vehicles

The BICA enhances any kitchen décor while brewing the perfect cup of coffee

Installation of the Built-In Coffee Appliance (BICA) in a multimillion dollar yacht Newport Beach, CA

To further the built-in appearance, the BICA can be mounted into custom cabinetry
